

## **Nativo Lodge Artist Guest Rooms Policy**

Congratulations! You have chosen to experience one of the most unique rooms in all of the Southwest. As you know, your room is a work of art which took months of planning by premier and upcoming Native American artists. You alone will have exclusive access to this work of art and will be solely responsible for its well-being. Here are a few items to keep in mind that will ensure that the art is preserved during your stay so that many more people can experience it.

- Enjoy the art. This is the most important. In this unique medium, the experience can be customized. You can play your favorite playlist, sit in total silence, or do Yoga in the room. The choice is yours and we would love to hear about it.
- Do not touch the painted walls. The impact of your hands may not be seen immediately, but over time can be very destructive. We want this room to be available for future guests the same way you see it.
- Be mindful when consuming food and drink in the room. Of course you can enjoy a meal in your room, however please avoid splatter or spills.
- Take care when entering or leaving the room with luggage not to excessively contact the walls in the entry way.
- Educate yourself! We have many resources to find out the meaning behind the artists' vision and highly recommend utilizing them.
- If there are any problems with the artwork, please notify the hotel staff immediately. DO NOT try to clean the walls yourself. Many of these rooms require special cleaning instructions and may be damaged further by conventional cleaning methods.

As a registered guest of this room you are financially responsible for any damages to or any excessive/exceptional cleaning of the room. If you have any questions you can contact a supervisor or manager on property for assistance.

We thank you for choosing the Nativo Lodge for your hospitality needs and truly hope you enjoy this unique experience.
